The programme concluded with sweet distribution.

Makerspace

TOSC Conducted an installation of Makerspace by students. Makerspace is not only a hackshop where you can go to learn how to use an arc welder for the afternoon, but an educational concept as well! A makerspace presents readily-available materials that can act as a provocation for inquiry, as well as modern technology and items to invent with. To define a school makerspace by its purpose and simplest of terms, it is a place where young people have an opportunity to explore their own interests; learn to use tools and materials, both physical and virtual; and develop creative projects.There is something unique about making physical things. These things are like little pieces of us and seem to embody portions of our souls.
